

WORKING TECHNOLOGIES

Specialists in Telecoms and I.T.

Lines and Minutes

Your path to a single source solution

Working Technologies is progressing and developing all the time to provide you with the best possible solutions....did you know that we are now able to manage lines internally without the need to involve third party companies.

We are now in the position to manage your lines with the same management and technical team as your phone system.

What does this mean for you?

We can provide a seamless technical support for both the system and the lines together, ensuring that any issues are resolved in the quickest possible timescales, with the least amount of inconvenience to you and your customers.

We are very competitive on costs with ISDN2 circuits at £24.00 per month for 2 lines, analogue lines at £11.99 per month and call charges at less than 1p per minute for local and national and mobile calls at 6p per minute. Business grade ADSL at £24.99 per month for unlimited usage.

We can do a cost analysis to show you any savings or provide you a call analysis tool to check your own bills.

Our aim is to make customers telephone usage fit their business better and save you time and money. Deal exclusively with Working Technologies and you don't have to worry which provider to call when you need advice or help.

If you would like us to provide you with a quote for your ADSL, lines and calls:
